

Escape with Passport™

A revolutionary workout experience comes standard.

What if you could run through your favorite exotic destination, any time you stepped on your training machines? With the Virtual Active™-enabled Passport™ system, you can.

Passport™ Featuring Virtual Active™ – What It Does

When your fitness equipment is enabled with Passport™, you're enabled to escape the confines of an ordinary workout, and everything becomes better. Experience Passport™ and see where it takes you.

With Virtual Active™, you can run or walk through your destination as dynamic, high definition video content is displayed on your television. The experience is further brought to life as you feel gradual terrain changes under your feet as you go up and down hills or stairs; and as you hear the ambient sounds of your destination through your speakers or headphones.

Passport™ featuring Virtual Active™ offers an escape unlike anything else available today.

Speed Interactive

Your video is truly immersive. As you speed up or slow down, so will the rate at which your video playback is displayed.

Incline Interactive

You'll feel gradual terrain changes under your feet as you make your way through your destination.

fitVISTA™ Heads Up Display

With Passport™, there's no need to keep your head down to track your progress. With the fitVISTA™ Heads Up Display, your workout stats are projected onto your existing television screen over your Virtual Active™ video or Passport Cinema™ media content.

Passport Cinema™

Passport Cinema™ allows you to take advantage of the fitVISTA™ Heads Up Display while watching your favorite programming. Simply download your show or movie onto the included USB, plug it in, and you'll see all of your workout feedback with your favorite programs.

Passport™ Featuring Virtual Active™ – How It Works

1

Connect Passport™ Player to your TV using the included video cables. Connect power adaptor to player and power outlet. Follow menu options to sync player.

2

Insert Passport™ USB stick into the player.

3

Follow the menu prompts to run through the included destinations.
